SUBSEE+
Real-Time Image Enhancement Software for Underwater Videos

SUBSEE+ is a real-time video image processing software developed by Subsea Tech to enhance the quality of images in turbid underwater environments.

It operates on a standard PC with Windows OS, either in real-time or for post-processing.

Very easy to install and equipped with adjustable parameters, SUBSEE+ is an intuitive and efficient tool for navigation and inspection in turbid environments.
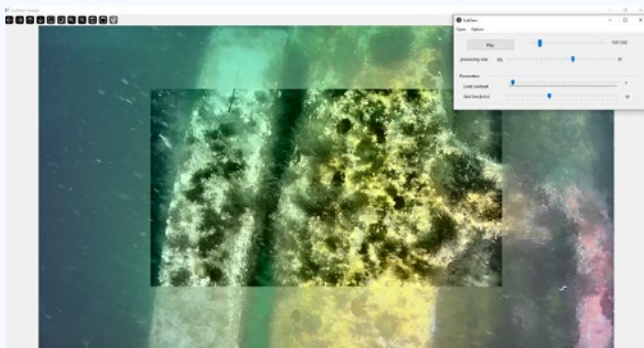

Applications

- **Structural inspections**
- **Search & Rescue missions**
- **Scientific research**
- **Monitoring of sensitive sites**

TECHNICAL SPECIFICATIONS

Minimum PC Configuration	Windows 10 OS or later, i5 processor, 8GB RAM
Adjustable Parameters	Processing window, contrast, resolution
Compatible Files	.avi, .mp4, .mpeg-4, .mov
Resolutions	HD, Full HD, 4K
